

# Safety BOLLARDS

www.TURNSTILES.us Steel Safety Bollards provide corner and case protection in a variety of sizes. Quick and easy to install, www.TURNSTILES.us Bollards feature superior design and can withstand heavy impact.

## 3" Diameter Safety Bollard

www.TURNSTILES.us standard safety bollard has a 3" OD tube for a post made from 11-gauge cold-rolled steel.

The base is a 5.5" flange with four anchor holes and comes with a base cover.

All mid size Bollards come with a standard white poly coated finish. Additional finish options include; hot dipped galvanized, stainless steel, high polished chrome and variety of powder coat colors.

## Compact Stainless Steel Safety Bollard

The tough and attractive compact bollard has a single mounting bolt extending through the entire unit, with 1" expansion anchor.

Cylindrical design eliminates buildup of debris behind the unit, offering easier maintenance.

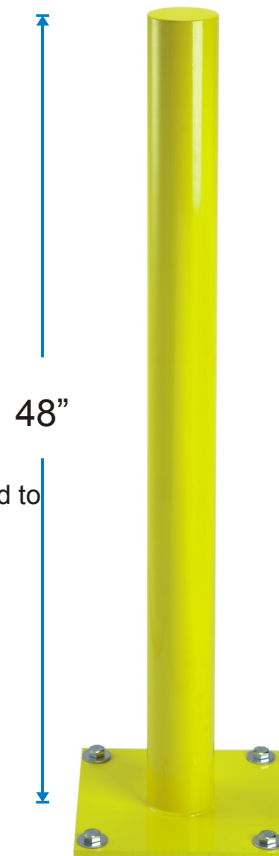

The compact bollard is 12" high x 4" in diameter and is made from 11-gauge #304 stainless steel.

## 4" Diameter Industrial Steel Bollard

www.TURNSTILES.us industrial steel safety bollards are designed to protect back room and electrical fixtures. The bollard post is a 4" OD tube made from 11-gauge cold-rolled steel with a 12 inch square by 1/2 inch thick mounting flange.

The base has four anchor holes and comes with four 1" expansion anchors that expand to lock the bollard securely in place.

All industrial steel bollards come with a standard safety yellow poly coated finish and are available in a variety of poly coated colors. A hot dipped galvanized finish is also available.
