

PermaGuard

REMOVABLE BUMPER SYSTEM

Tough enough for use in virtually all applications, yet suitable for any decor, the PermaGuard removable bumper system features a hard anodized aluminum front rail to absorb impact from shopping and stocking carts.

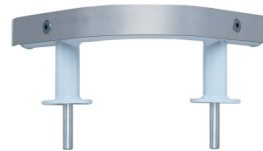

Straight Sections

PermaGuard comes in standard lengths of 2, 3, 4, 5, 6, 8 and 10 feet. Custom lengths are also available. All sections are installed independently, so it's easy for one person to remove an entire row for cleaning.

Corner Sections

Available in 90 and 135 degree configurations, corner sections maintain the same level of protection in vulnerable corner areas.

- Protects refrigerated cases, walls, display shelves and gondolas from cart damage
- Removable for floor and case maintenance
- Hard anodized aluminum front rail absorbs most impacts and can be replaced if severely damaged
- Available in various lengths and corner sections to allow flexible configuration for your application
