

Alvarado's prefabricated steel railing system uses posts and strategically located rail outlets to create tailored railing layouts for indoor and outdoor applications.

Alvarado post and rail may be used for virtually any crowd control or queuing application, such as directing patrons through turnstiles, retail aisles or checkout lanes.

It may also be used in conjunction with bumper systems to create cart corrals.

Available in both double and triple rail configurations, Alvarado railing systems feature 2.25" diameter steel posts with a flanged base and base covers that conceal post anchor bolts.

Rail outlets are secured tightly to the post, allowing insertion of 1.75" diameter rails that are fastened with set screws.

Standard finish for Alvarado post and rail is bright chrome, with polished or satin stainless steel and color powder coat finishes also available.

- ***Prefabricated System Allows Various Layouts***
- ***16 Gauge Steel Tubing***
