

ULTIMA

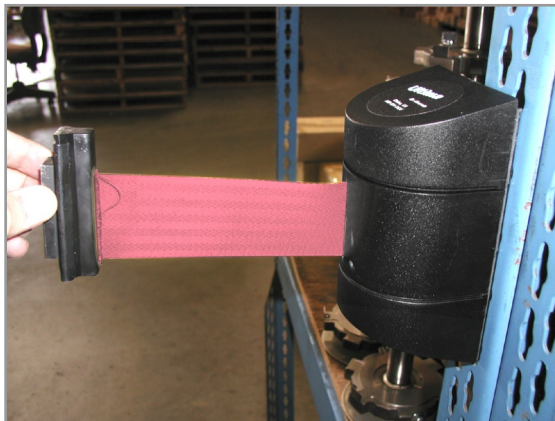

SAFETY BARRICADE

Alvarado's Ultima was developed to address the specific concern for customer and personnel safety when merchandise is being stocked. The Ultima houses a retractable 12-foot belt that when extended, creates a temporary aisle closure.

The Ultima attaches to upright high-rack shelving found in most warehouse and home improvement stores. The unit can be moved quickly from aisle to aisle to create a temporary barrier.

Belt ends are available as magnetic or wire loop. Standard belt colors are yellow and red. The yellow belt includes the silk screened message shown above at no additional charge. Custom belt colors/messages are also available.

Ultima Features:

- Provides a cost-effective temporary safety barrier
- 12 foot retractable belt keeps customers out of aisles being restocked
- Available as shown, or with custom messages
